

How cashback Possible on NavEM?

NavExM rewards its community members with cashback of up to 0.10% of the trade value on each trade. Both makers and takers are eligible to receive cashback rewards.

NavExM's settlement engine is one of the core components of its trading engine, ensuring that When users place orders on the NavExM platform, these trades are seamlessly routed through NavC Tokens. This unique feature of NavExM creates a consistent demand for NavC tokens, as more users flock to NavExM to trade, the demand for NavC Tokens surges. However, the token's supply remains fixed, resulting in a classic supply-and-demand scenario. The consequence of this limited supply is a steady increase in the value of NavC Tokens. As NavC Tokens appreciate in price, the capital held in these tokens also appreciates, effectively capital appreciation of the capital held in NavC Token.

To incentivize active participation in the NavExM ecosystem, the platform generously rewards its users with cashback incentives, providing up to 0.10% cashback on trading activity. This encourages users to trade more, reinforcing the demand for NavC Tokens and, in turn, increasing their value.

CALCULATION OF CASHBACK

For Member who hold 500 NavC Token

The cashback amount is based on the NavC token price appreciation for the trades, which is up to 0.05% of the transaction value to be distributed between the takers and makers @ 60% and 40%, respectively.

For example, if a transaction of \$100,000 happens on NavExM, the taker will get a maximum of $\$100,000 * 0.05\% * 60\% = \30 worth of NavC, and the maker will get a maximum of $\$100,000 * 0.05\% * 40\% = \20 worth of NavC.
